

Beware when signing up for gym membership

I AM writing to advise the public to be careful when they sign up for gym membership. A lot of people have signed up for long-term membership and then their gym either closes or moves to a location that is not convenient for them. I am not sure which government ministry regulates these gyms but there should be some authority monitoring them.

I signed up for membership with a gym on Aug 26 last year, intending to start using the outlet in my area from January 2017.

But this outlet closed down even before I officially started my membership.

The gym operators sent out a notice on Oct 31, 2016 informing of the closure. This means they were aware that the outlet would be

closed and yet they got me to sign up without informing me of the forthcoming closure. This is fraud on their part.

They have refused to give me a refund and I am now pursuing other avenues to recover my money.
